Corrio Planter Tub

**LOGIC**<sup>TM</sup>  
MANUFACTURED BESPOKE

[www.logic-bespoke.com](http://www.logic-bespoke.com)

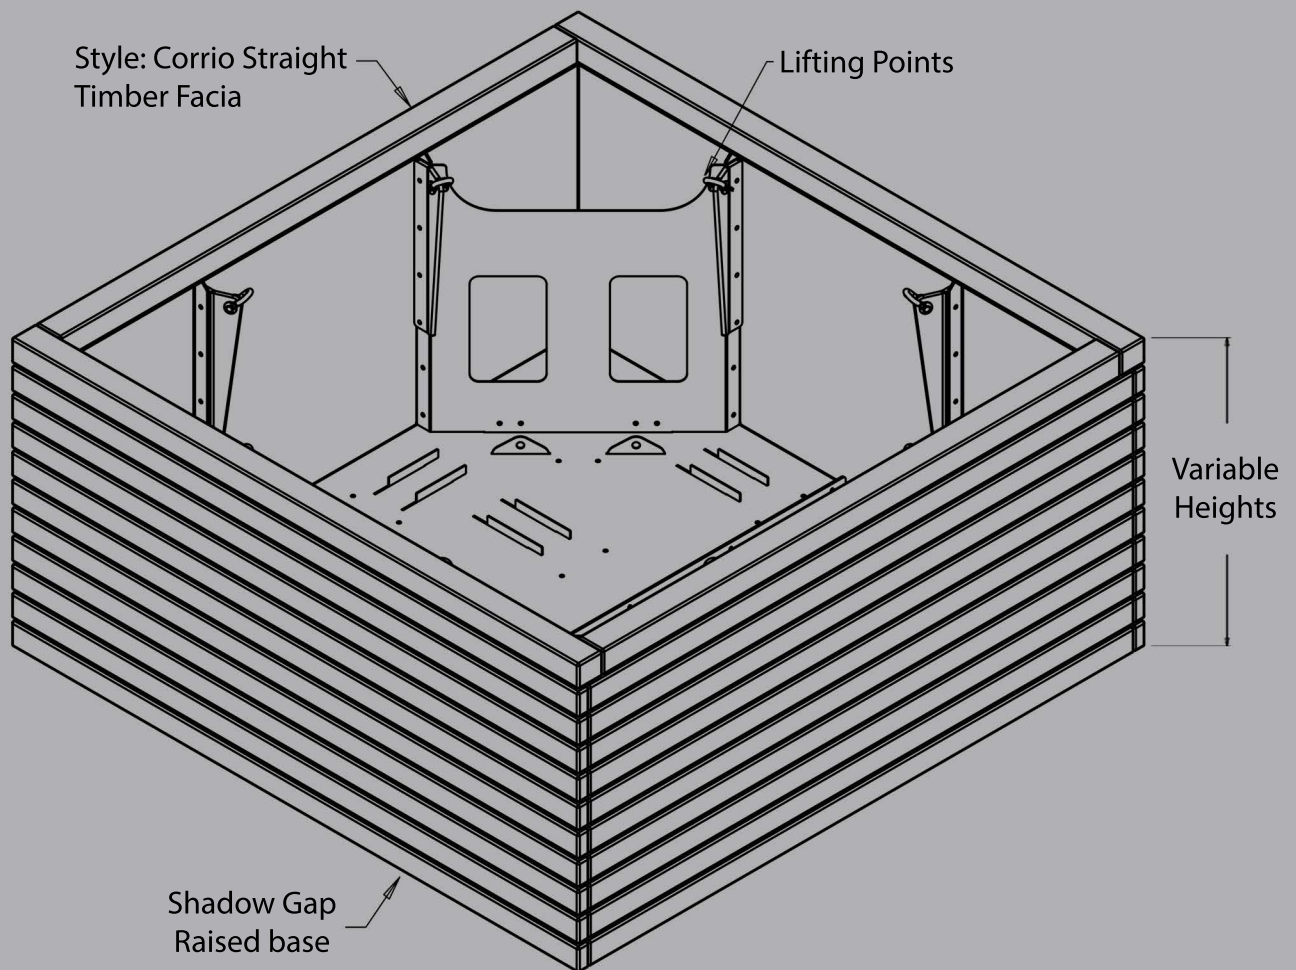

## Design

The Corrio Raised Planter Edge is defined by its vertical face and classic 50mm top return & horizontal timber fascia. For use in areas where access is required; this may be due to services above/below ground where the planters are to be placed, or external events may require temporary relocation. With cleverly hidden lifting eyes, these can be lifted complete with soil and planting content. Due to this, there are certain dimensional restrictions of which our Technical Team can advise on.

## Dimensions

This design is available in any height from 580mm up to 1080mm. Foot prints available 1580x1580mm upto 2080x2080.

## Shape

These designs are available in square, rectangular designs.

Square / Rectangular

## Product Datasheet

Corrio Planter Tub

### Finishes

Many finishes are available with this design, we've list below the three most popular. However, there are other specialist finishes available, for more information on these please contact the Logic technical team.

#### Base Material

##### Powder Coated

Wide range of options from RAL colour spectrum

##### Stainless Steel

Available in varying grades, according to durability required.

##### Weathering Steel

Grade A, for further detail please refer to Logic datasheet.

#### Facia Material

##### Tropical

Class 1 & Class 2 tropical hardwood: Opepe, Iroko, etc.

##### UK Grown

Class 2 & Class 3 sustainable timbers: Oak, Douglas Fir, ect.
